### Education

- Software Development Technician – Cenfotec University (2019).
- Conversational English - Idioma Internacional. (2018-2019).
- Software Development Engineering – Cenfotec University (2019 – 2023)
- T4, Training for trainers - Elev8 (2022)

### Work Experience

#### 2020-2022 Tek Experts

I initially joined as a Software Support Engineer and later advanced to the position of Technical Lead in the Web Applications team. I also served as a trainer for new team members, imparting my knowledge and expertise. I successfully trained 40 new company members across different hiring waves, contributing to their onboarding and the overall growth of the team. Consistently recognized as a top performer, underscoring my dedication, work ethic, and ability to consistently deliver outstanding results.

#### 2022-2023 Microsoft

I was part of the WebApps US team. During my time there as a Software Support Engineer, I consistently performed well and helped both my team and Microsoft customers, particularly in addressing Azure and code-related issues. Additionally, I improved company processes and joined an internal organization to help Afro-American people in Costa Rica with fewer means.

#### 2023-2024 Tek Experts

I rejoined the company and secured the position of Technical Advisor, thanks to the extensive knowledge I had gained. Now, I contribute to the entire WebApps organization by assisting with cases, creating documentation, giving refreshers, and staying updated on various Microsoft technologies. I make difficult decisions with critical thinking that directly impact team performance, as I am the highest escalation point for over 20 engineers.
